

## AOC Monitors Gears Bangladesh Partners

Internationally renown Monitor brand - AOC conducted 'display bootcamp'a partner sales training program in Dhaka recently. The event was two-pronged, where the first session was purely sales oriented and focused on sharpening sales skills. The 2<sup>nd</sup> session primarily focused on general display technologies ranging from the difference between LED and LCD to IPS monitors. The session also covered the basics of 3D technologies and geared the sales team to better inform consumers on the

various 3D technologies available currently. Knockdown monitors were used to highlight the different technologies.

Present at the event were the sales force of AOC's national distributor Khan Jahan Ali Computers and current Volume partners namely BusinessLand, Safe IT, Excel Technologies, Rahman Corporation, System Palace, BusinessLink, Computer Village and Computer City.

'our goal is to prepare the sales teams for the future by giving them a broad knowledge on displays and the direction displays are heading' said Shalini Pandey, Director Sales (AOC) Limited.

'the general nature of the training adds a lot of value to our sales teams as it builds their general knowledge which they don't have the time to research on their own', said Muhammad Mushtaq of Khan Jahan Ali Computers. ## New Types of CCTV in Bangladesh

Orient Computers brings new, high quality and more effective CCTVs in Bangladesh with attractive design. You can easily keep your home, office or workshop safer by using these CCTVs made with superior technology.

Orient is primarily bringing two types of CCTV cameras in Bangladesh, namely IP and IR. The IP Camera can perform in any kind of weather and they contain 4-9 mm lens. They also have very good resolution. The IP cameras can rotate 90-degree up-down and 360 degree right-left and are available with attractive colours and designs. You can easily have an eye on your home or workplace from any place through internet by using the IP CCTV Cameras.

Orient is bringing another type of CCTV Camera, named IR Camera. These cameras help you protect your home or workplace during daytime or at night. Orient is bringing WDR CCTV Camera as well.

Orient Computers is a brand for sales and marketing of Projector, Online UPS, Offline UPS, Automatic Voltage Stabilizer, Inverter etc. and has been in function for more than 13 years. The new CCTV Cameras can be collected from any outlet of Orient Computers in Dhaka or other districts. Renowned for its wonderful service, Orient Computers has branches in Dhaka, Chittagong, Rajshahi and also in most of the districts ■

## World's Largest 100G WDM Network

Haawei On 23 February has today announced that it has won a bid to deploy the 100G WDM network for Project 211 (phase 3) of the China Education and Research Network (CERNET). Covering the entire country, the coherent WDM technology based 100G network will be the world's largest in terms of geographic coverage. CERNET is committed to building and managing a nationwide academic internet. The 100G network will have the capability to offer a bandwidth of 8 Tbit/s over a single fiber, a transmission distance of 11,400 km and 913km biggest single span without REG (Regenerator), and it will allow co-transmission of 100G traffic with the existing 10G traffic. Full compatibility with the legacy network ensures smooth capacity expansion and protects CERNET's investment in network infrastructure.

## D-LINK Introduces Mydlink iPhone/Android Application

Communication is vital to a company's success. With mydlink-enabled products, it's simple to stay connected to everything that you love.

Throughout your busy week, stay connected to everything that you love 24/7. View your home and keep an eye on your kids, your pets and your valued possessions from anywhere over the Internet and enjoy the peace of mind that comes from knowing everything is safe and secure.

To make home monitoring a truly simple experience, D-Link created mydlink.com so you can access your live camera feed from any Internet-connected computer or mobile device, anytime. You can monitor on-the-go... even if you don't have access to a computer! Simply download the free mydlink app on your smart phones and tablets. You are all set to see live video feeds or capture pictures to share with friends and family.
