

## BlackBerry May Set up Server Farm in Bangladesh

The Canadian smartphone brand BlackBerry, known for offering unparalleled security in

communication, has expressed interest in setting up a server farm in Bangladesh to appease the home ministry's security concerns, in a bid to tap into the market. A team from BlackBerry recently came to discuss some intelligence issues with BTRC. As per licensing terms and conditions in most countries, the government reserves the right to gain access to telecom service providers' networks as and when it deems necessary. But this lawful interception to monitor e-mails or instant messages comes to little use in cases of subscribers with BlackBerry handsets, as the messages sent from the devices are highly encrypted to protect privacy. BlackBerry services are currently provided by Grameenphone and Airtel that together have 6,325 subscribers. All subscribers use postpaid services, with BTRC and law enforcement agencies having easy access to information on them via their SIM registrations. But once the server is set up, prepaid subscribers will also be able to use BlackBerry handsets in Bangladesh ■

This is world's best NFC experience on a tablet with a textured tactile design for enhanced comfort measuring just 10.45mm thin and 340g light. The tablet PC has a price-tag of Taka 36,000/-. For contact- Phone : 01915476355, 9183291 ■

## ASUS Next Generation Dual-Band Router

ASUS RT-AC66U router integrates dual-band Gigabit wireless with fifth generation 802.11ac Wi-Fi technology, also known as 5G Wi-Fi, which enables speeds up to three times faster than existing 802.11n. As one of the first routers to achieve this, it tops Gigabit

wireless requirements with a combined 2.4GHz/5GHz bandwidth of 1.75Gbps. This massive data rate makes it an excellent high speed router for demanding online applications, coupled with exclusive ASUS AiRadar signal amplification and shaping technology to strengthen signals to devices, amplifying transmission in all directions to better overcome environmental obstructions and improve data rates. Easy ASUSWRT setup, multiple SSIDs, and IPv6 support further enhance networking, while strong USB-based capabilities turn the RT-AC66U into a 3G, FTP, DLNA, and printer server for genuine multi-role functionality. So, this device reducing costs as there is no need to buy standalone server hardware. The router has a price-tag of Taka 16,500/-. For contact- Phone: 01915476353, 9183291 ■

## CSL Brings Samsung Mini Laser Printer

Country's leading ICT products and service provider Computer Source brings the smallest laser printer to the local market. Having Wi-fi connection, one can easily print his/her documents from any kind of Smart phone, Tab and all kind of PC by this small and Ultra-Compact printer, Samsung ML-2165W. Measuring just 7.2" H x 13.4" W x 8.8" D, the ML- ML-2165W fits comfortably on a shelf or corner of the desk. The processor speed of this printer is 300 MHz and has built in 32 MB memories. It has 2 LED Display to measure the ink level and printing status. The Printing Speed of ML-2165W is 21 PPM and it can print frequently; first page out in less than 8.5 seconds with duty cycle per month is up to 10,000 pages. It's weights only 4 Kg. The printer supports various media types such as Plain, Thick, Thin, Cotton, Color, Preprinted, Recycled, Labels, Cardstock, Bond, Archive and Envelope. The price of the Samsung ML-2165W is only 9,500/-. Contact for details @ 0171365202 ■

## 5.7-Inch iPhone in 2014!

Apple Inc is exploring launching iPhones with bigger screens, as well as cheaper models in a range of colours, over the next year, said four people with knowledge of the matter, as it takes a cue from rival Samsung Electronics. The moves, which are still under discussion, underscore how the California-based firm

that once ruled the smartphone market is increasingly under threat from its aggressive South Korean competitor. Samsung has overtaken Apple in market share through the popularity of its bigger-screen Galaxy 'phablets' and by flooding the market with a range of products at different prices. Apple is looking at introducing at least two bigger iPhones next year - one with a 4.7-inch screen and one with a 5.7-inch screen - said the sources, including those in the supply chain in Asia. They said suppliers have been approached with plans for the larger screens, but noted it is still unclear whether Apple will actually launch its flagship product in the larger sizes ■
