

Interactive Session 'Kids & Technology' held

Intel Bangladesh and British Council recently hosted at Dhaka an interactive session with media to focus on how the touch-generation can benefit from technology and how it positively impacts the quality of life. The event titled as 'Kids and Technology' was held at Bengal Gallery of Fine Arts in an informative and relaxed environment with a panel of expert speakers.

Rajiv Bhalla, Director - Strategic Initiatives, Intel South Asia, Zia Manzur, Country Business Manager for Intel in Bangladesh, Alexandra Tyers, Sr. Training and Development Consultant, British Council, Dr. Jena Derakhshani Hamadani, Head of Child Development Unit, ICDDR,B and Zakia

Zia Manzur is talking at the event

Sultana, Assistant Professor, Department of English, Adamjee Cantonment College, Dhaka were present at this occasion. Speaking at the event, Rajiv Bhalla, said, 'Today's kids are so completely at ease with navigating and flicking their way through devices to get to the latest game on a smart phone or tablet. The rapid spread of touch-screen computing devices like smartphones and tablets is creating a generation of children that we call the 'Touch Generation' – and they're heralding a new era that fundamentally changes the way we interact with computers.

The event covered a wide range of topics. The event also showcased some of the latest high tech touch devices; latest Tablets, All-in-One PCs all powered by Intel processors ■

ASUS Maximus VI Hero 4th Generation Motherboard

As the newest board in ASUS' ever-expanding ROG lineup, the Maximus VI Hero is built to redefine value in the ROG series. The Hero is packed full of features that we typically look for to maximize our gaming experience. The SupremeFX 8-Channel HD audio brings an amazing audio experience and Sonic Radar is an audio positioning engine which helps to locate

opponents in games from sounds like gunshots or footsteps. One more gaming-related feature the Hero brings is Gamefirst II. This helps the online gaming experience by ensuring pings and latency is kept low through constant packet inspection and management. Its integrated Graphics Processor supports Intel InTru 3D, Clear Video HD Technology.

The motherboard supports Intel 4th generation processors in the LGA1150 package, having Z87 Express chipset, six native USB 3.0 ports, six native SATA 6G ports, full support for PCI-E 3.0 including 16 PCI-E lanes. The product has a price-tag of Taka 23,000/-. Phone : 01713257938, 9183291 ■
