

1st SAP S/4 HANA Implementation in Bangladesh

LEADS Corporation Limited successfully implemented SAP S/4 HANA suite at CloudWell Limited. This is the very first implementation of this solution in Bangladesh.

In today's digital world, organizations need greater flexibility and the ability to execute business operations without limitation. SAP S/4 HANA can help an organization address every opportunity in the digital world. SAP Business Suite 4 HANA (High-Performance Analytic Appliance) is an in-memory, column-oriented, relational database management system developed and marketed by SAP, the world renowned German ERP company.

Shaikh Abdul Aziz, Chairman, LEADS Group is handing over a crest to Faizul Hamid, MD of CloudWell Limited, whilst Rana Shohel and others look on

CloudWell Limited provides application for agent-based last mile payment solutions to telecom operators and mobile financial services. The company was founded in 2012 and is based in Dhaka, Bangladesh. They are the first user of SAP S/4 HANA ERP in Bangladesh. LEADS Corporation Limited, founded in 1992, a leading software house and SystemIntegration Company in Bangladesh, implemented the SAP project.

LEADS Corporation Limited celebrated this event on 7th March 2017 in Dhaka where LEADS Group Chairman Shaikh Abdul Aziz, CloudWell's Chairman Mohammad Anisul Islam, CloudWell's Managing Director Faizul Hamid, LEADS' COO Rana Shohel, LEADS' Head of S&M Sheikh Abdullah Al-Mamun and others were present. RupeshLunkad of SAP India graced the occasion by his presence ♦

Oracle Cloud Platform Continues to Gain Momentum

Today at its premier developer event on March 21 last Oracle has announced that an increasing number of global enterprises, SMBs, and ISVs are choosing the Oracle Cloud Platform to speed innovation, simplify IT, reduce costs, and deliver stellar customer experiences. 7-Eleven, Altair, Astute Business Solutions, Bitnami, Calypso Technology, Ford Motor Company, GE Capital Business Process Management Services, HashiCorp, Infotech, SAS, Vertiv Corporation, and Zensar Technologies are just a few of the many organizations that are using Oracle Cloud's PaaS and IaaS services to easily develop, test, and deploy high-performance applications in the cloud. Additionally, Oracle continues to expand its cloud portfolio, making it even more compelling for customers to move to the cloud. The Oracle Cloud Platform provides customers, partners, and developers with everything they need to build, deploy, and extend applications and run business-critical workloads in a low-latency, highly available, secure cloud environment. For developers, the Oracle Cloud Platform provides the foundation they need to provide cutting-edge applications that leverage the latest technology innovations. In the past two years alone, Oracle has delivered more than 50 PaaS and IaaS services to market and introduced new deployment options such as Oracle Cloud at Customer, providing unparalleled opportunity for customers.

'Organizations across industries and geographies are increasingly taking advantage of the Oracle Cloud Platform to quickly develop and deploy business-critical applications,' said Amit Zavery, senior vice president, Oracle Cloud Platform. For detail Mobile : 01841008835 ♦
